

Devices from [Let Medical](#) presented in this site will help you in a quick and efficient way, as well as with no side effects, to relieve any kind of pain and to put to finish multiple long-term diseases.

We offer various models — from first-aid, [home and personal models](#) , which can be easily operated even by a lay person to administer first aid and help to keep up healthy every day, to [professional devices](#) , which can help not only to treat serious chronic diseases, but also regenerate damaged organs and tissues of the body.

Skenar provides a specific effect to a body, it is called a self-supervisory energy-neuro-adaptive regulation. In other words, it cocks latent, 'dormant' systems for self-regulation and self-restoration. Skenar technology restores body functioning to the level it was at before the disease. It stimulates recovery of the body using its potential as an organism in general.

COSMODIC is a more [advanced technology](#) , which restores body functioning at the cell level. It restores body functioning using both general organism potential used in skenar technology plus cell potential at the genetically inherent level, which provides rejuvenation effects. The treatment, simple enough for home use by people with no prior medical training, enables taking fewer visits to doctors, fewer medications, improving and maintaining the health of yours and your family.

The COSMODIC devices can help not only with long-term diseases - depending on the mode and way of application, they're a great help in common household injuries, treating bruises, sprains, burns etc.

{typography uistate theme="blitzer" icon="ui-icon-info" boxstyle="float: none; margin: 5px;"}Devices will be of great use to adults and children, to elderly people, athletes and students, and to everybody who cares for one's health. {/typography}

Features of devices:

{typography list type="bullet_red"}**Neuron-like electrical impulse:** Device generates electrical impulses in a way that is similar to those that run naturally through our body.||

Biological feedback: Device unwaveringly pays close attention to the reacting of our organism on its influence, and accordingly transforms the way of pulsing.||

Non-invasiveness: Device influences our body by means of microampere electrical currents, without causing electrical damage to the tissue. ||

Regulating function: due to biological feedback COSMODIC renders regulating (not just stimulating) influence to our organism.||

Easy handling: minimum of control buttons, easy tuning and presence of an in-built electrode enable one to use COSMODIC right after first introduction.||

Evident result: Device allows to get evident results already during the first session, at the same time it promptly removes pain (analgesic effect usually comes first after app. 15 min). ||

Compactness: dimensions of ["home" cosmodic devices](#) do not exceed the size of medium cell phone. This allows you to take device on a trip, a mission or just traveling as it would be a universal and efficient first-aid kit.{/typography}
